

WORK EXPERIENCE

Capital One (Formerly Discover)

Summer 2022; August 2023 - Present (3 yrs 1 mo)

Card Call Center Software, Full-Stack Software Engineer II

April 2025 - Present

- Integrated an LLM-powered AI chatbot into call center software, enabling agents to quickly find answers while assisting customers
- Developed a map verification tool using Google Maps API that allows agents to validate customer home addresses
- Improved shared inner-source UI components to enhance usability and accessibility across teams
- Built and maintained Playwright test infrastructure for team-owned components, replacing manual testing workflows

Card Call Center Software, Full-Stack Software Engineer I

August 2024 - April 2025

- Led development of a full-stack internal app in React to manage call center disclosure databases, reducing time and effort for creating, updating, and deleting disclosures by 90%
- Improved and led team Agile ceremonies, including sprint reviews, reducing sprint velocity variance by over 3x and enhancing transparency between engineering and business teams
- Spoke in organization-wide tech talk on the process of getting an AWS certification and tips on how to study for it
- Presented live demos on how to create, edit, delete, and view call center disclosure data using the internal tool as well as where in the code base other teams should add their components in the future

Bank Call Center Software, Back-End Software Engineer I

August 2023 - August 2024

- Developed new Spring REST API endpoints for Discover's bank call center software, increasing data retrieval speeds by over 50%
- Modernized call center client software by integrating new API endpoints, reducing call handling times and improving efficiency
- Conducted testing using Postman and JUnit to ensure the reliability of new endpoints and client upgrades
- Identified and resolved critical production bugs to maintain system stability, impacting agents' ability to open new customer accounts

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C#, C++, C, Bash, HTML, CSS

Tools & Technologies: Spring, React, Node, REST APIs, GraphQL, SQL (PostgreSQL), AWS, Unix, CI/CD (Jenkins), Playwright, OpenShift (Kubernetes), Postman, Vitest

AWARDS AND CERTIFICATIONS

Stevie Award: Team project Disclosure Playback for reading automated disclosures to customers, recognized as the 2024 Bronze Technical Innovation of the Year and Gold Technology Team of the Year

Certifications: AWS Certified Cloud Practitioner

EDUCATION

University of Illinois Urbana-Champaign

Master of Business Administration

Online

August 2026 - est May 2028

Purdue University

Bachelor of Science in Computer Science; GPA: 3.62

West Lafayette, IN

August 2019 - May 2023
